

EMAS Policy Statement

In addition to our on-going commitment in achieving compliance with the recognised 'Environmental Management Standard' – BS EN ISO 14001, we at Haigh Rail Limited are also committed toward the achievement of further 'Environmental Excellence' by adoption of the widely acclaimed EMAS Principles of environmental management.

In making this statement, we recognise and accept our responsibility for any 'Harmful Effects' our operations may have on both the 'Local and the Global Environment', and as such we shall continue to work toward reducing their overall adverse impact.

In support of these challenging commitments, compliance with our continually developing management systems shall ensure the following statements are supported, implemented and maintained throughout all aspects of our operations:

- We shall continue to promote, monitor and support our 'Staff Awareness' to environmental management and the reduction of any adverse impact our operations may have through structured training and briefing programs.
- We shall be committed to the minimisation of waste through the evaluation of our operations and the efficient use of raw material, product and energy resource.
- We shall work toward the minimisation of any 'Toxic' omission resulting from our operations, our fleet of vehicles and / or any other plant and equipment we may own or acquire under hire agreements.
- We shall actively promote and encourage all forms of 'Recycling', through our own on-going internal relationships as well as those with our clients and our supplier base such that any waste product generated may be re-processed and subsequently re-used for the betterment of the environment as a whole.
- We shall continue to source and promote 'Environmentally Friendly' raw materials and products that are in turn supported by structured 'Regeneration Programmes' aimed at supporting the ecology of the environment in which we all live.
- We shall also consider the application of supporting an accredited program aimed at offsetting any 'Greenhouse Gas' omission that may be generated through all aspects of our Company's activities.
- We shall continue to devise, monitor and report pre-determined 'Indicators' having required / expected 'Levels of Performance', that when considered and compared to previous levels of 'Performance' serve to confirm our on-going continual improvement and the reduction of our 'Environmental Impact' as a whole.

Haigh Rail Limited shall encourage and expect similar levels of commitment and control from its clients, and its supplier base.

Chris Haigh
(Managing Director)
